The following is a beginners guide to making the most out of your internet marketing game plan.

Ideally, you want to create your own product.

The best money making products for internet marketing are information type ebooks, reports, etc.

If you've got a great amount of knowledge or expertise on a certain subject, then you can create an ebook or report on the topic.

If for some reason you can't think of anything for a product of your own, then you can find many products that you can sell by becoming an affiliate and earning a percentage of each sale.

To find these products, simply take a look at this website: <http://clickbank.com>

It's free to sign up and use.

#2 - Once you've created or found a product you'll want to get the word out about it as soon as possible.

There are many proven ways to do this.

For example, you can go to <http://google.com> and use what is called Pay Per Click advertising.

This is where you pay for actual clicks on an ad you create for your product.

You do this by compiling a list keywords that are targeted to your product.

Keywords are basically search terms you use to find information on the topic of your choice.

Once you have a list of keywords, you can then place bids on each one. If someone searches for your keyword, clicks on your ad, then you're charged.

The person who clicks is sent to your website for the product. If they buy, you make a sale!

Pay Per Click is a great way to achieve internet marketing success.

#3 - A great no cost way of getting traffic to your website is to write and submit articles just like the one you're reading now.

All you need to do is write up a 300-500 word article on your product topic.

You can also write a review or a how-to style article. Just make sure the article is not an ad but gives out useful information on your subject.

At the end of your article, you'll create a resource box. This is nothing more than a small ad for the website that features your product.

Your readers will click on the link and be taken to your salesletter.

You can submit your articles to a great directory at <http://ezinearticles.com>

These three tips should help you make the most out of your internet marketing success.
