Hello there my friend.

Thank you for downloading a copy of my free report titled:

“A Simple, Step By Step Plan To Make Money On The Internet”.

A little bit about me...

“Gary has been a successful, full time internet marketer for over 11 years. He has created internet businesses that have earned as much as \$22,000 in a single day. If you want to know how to build a real money making internet business and squeeze it for every penny you can, then listen to what Gary says.” <http://opportunity-advisor.com>

Here’s over 400 articles I’ve personally written on how to make money on the internet...

Wishing You The Best,

Gary Baker

P.S. You have my permission to pass this report along to your friends, family members, and subscribers!

There are thousands of people every day that come online and want to make money on the internet. However there are also thousands more people who simply do not do what it takes to make money on the internet and fail.

So what I've done here is to provide you with a step by step plan that if you really dig in and put some work into, you can make money on the internet and will see your results come to you much faster.

The plan that follows has been time tested and proven to make money on the internet each and every time it is put into action so let's get right to it.

The first thing you need in order make money on the internet is something to sell. Yes you have to sell something. How else are you going to get sales? You do want to make money on the internet don't you?

Okay, you can do one of the two things here: First, you can make your own product such as an ebook, or you can become an affiliate for a product that has been created by another person.

It's up to you. You can make money on the internet either way but you can make way more money with your own product. Again, you can do go either route.

If you create your own product, it should be on a topic that you are pretty passionate about and have experience in. If you go the affiliate route, you can choose from a variety of products that

really get you excited and that you can get behind 100%.

If you are looking for an affiliate product to help you make money on the internet, then I highly recommend you head directly over to <http://clickbank.com/marketplace.htm>

There you can find thousands of products that will pay you a very nice commission on each sale.

Once you pick a product, your next step will be to create a short report on the product topic. This report should only be about 5-10 pages long.

Now I know you're already thinking "how can I make money on the internet with this report"? Hold on, we're getting there.

Anyway, you can either write the report yourself or you can do a little research and write it up that way too. What you will be doing is giving this report away for free.

Yes you're giving it away for free but you're still going to make money on the internet so stop worrying. Now what you want to do is, take the website link of your affiliate product and place it into the words of your report.

This way, when people read your report, they will see your link, click on it and go to the sales page. Once your report is written, you will need to turn into a PDF file. You can do this for free

by searching online for "free PDF tool".

Can you see how you're going to make money on the internet yet? If not keep reading. It get's better.

Next you'll want to create a short web page called a "squeeze page" and you can do this for free just do a search at "google.com" for "niche list builder".

It's a free program and will easily and quickly build you a great looking squeeze page.

Okay, now that you have a free report with your affiliate link inserted and you have a squeeze page, you can now start to get a bit more excited and know you are just minutes from being able to make money on the internet.

You will need an "autoresponder" for your squeeze page. This little tool will help collect the name and email addresses of the people who request your free report.

The best one to use is: <http://aweber.com>

Once you get the autoresponder working on your squeeze page, you will want to load it with your free report.

Now we get into the good part and where you're going to see exactly how to make money on the internet.

Make sure that your squeeze page is working. Your autoresponder is working. Your free report is spell checked and that your affiliate link is inserted and working.

Now here's how you are going to make money on the internet. Are you ready...

First thing...You will want to write and submit atleast two short articles per day on your niche. Keep the articles around 300-350 words each.

Stuff the articles full of useful tips for your readers. At the end of your article you will have a "resource box". Use it to drive the

readers of your articles to your squeeze page. Offer them the free report and have them sign up for it.

See what's happening now? You're building an opt in list of people who have shown strong interest in your affiliate product. They are joining your list. Some of them might purchase your product after reading your report.

Now to really make money on the internet, you will want to submit at least two new articles per day to <http://EzineArticles.com> You might also want to try using "Google AdWords" to drive targeted traffic to your squeeze page.

What you want to keep doing each and every day is write and submit articles, use pay per click, and get as many people as you can to sign up for your list.

Then you can send them extra information and articles on your topic as well as promotions for your products.

Due to limited space, there have been some stuff left out but in general this should get you started and this my friend is how you really make money money on the internet.

Talk soon,

Gary Baker

P.S. Stay tuned for more great money making information and opportunities coming right to your inbox very soon!
